

FARMERS' BIG BAG FILLER

BBBV

The Farmer's Big Bag Filler BBBV, with its slide and spout, has a robust design and is padded with soft landing material to prevent product damage.

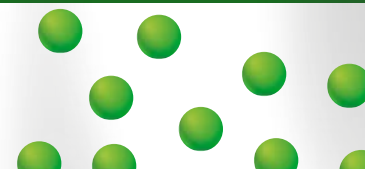

The product descends into the big bag quickly and consistently so that the big bag does not sag or bulge, but remains upright and perfectly stable. This makes the loading of trucks a lot easier. The big bag slides easily over four short rods. The standard BBBV can be fitted with raised side panels for increased volume. There are also models for cereals, fertiliser, sand and gravel, or with a flap for enhanced ease of use.

The BBBV can be combined with the box sorting machine or the box filler.

A version of the Farmers' Big Bag Filler is available to fit the Schouten tilt yoke for use with Schouten box sorting machines. This makes it possible to fill up big bags straight from a box sorting facility.

STABLE AND STRAIGHT FILLING OF BIG BAGS

FLEXIBLE USE FOR DELIVERING PRODUCT BATCHES

SPECIFICATIONS

FARMERS' BIG BAG FILLER

FEATURE	SPECIFICATIONS
Outside dimensions BBBV	Depth 142 cm, width 220 cm and height 112 cm.
Contents	2,20 m ³
Weight	300 kg

** Other sizes are available to order.*

OPTIONS

Weighing platform	The weighing platform can be used to weigh the contents of the BBBV.
Raised side panels	Top 250 mm higher than standard version.
BBBV for cereals, fertiliser, sand and gravel	The walls are sloping, but are not ridged and have no soft landing material (144 cm x 200 cm x 112 cm). This assists a smooth flow of product from the BBBV.
BBBV with flap	Instead of the slide there is a flap which can easily be controlled by hand from the side.
